How your support impacts Elevate Phoenix:

We strive to impact the lives of urban students in our community. Elevate Phoenix supports our potential future leaders who are currently dropping out at 52%, but after we step in, our students graduate at a rate of 98% and often become first in their family to complete high school. Even more impactful, 100% of these kids who may have had no hope for their future, leave high school with a post-secondary plan (college/certificated program, trade school, military, or workforce). Elevate Phoenix provides students the opportunity to become contributing citizens that give back to the community. All proceeds raised at this event go directly to the programs that impact the lives of over 5000 students.

We could not do what we do without you!
